

“WING” wood Bench

Sheet code: PAAR086

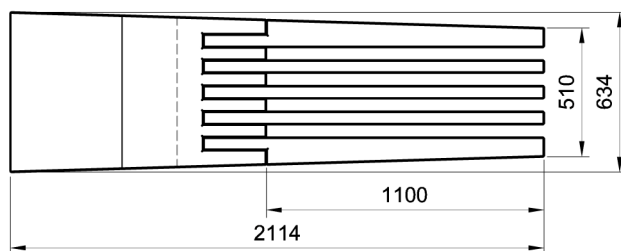

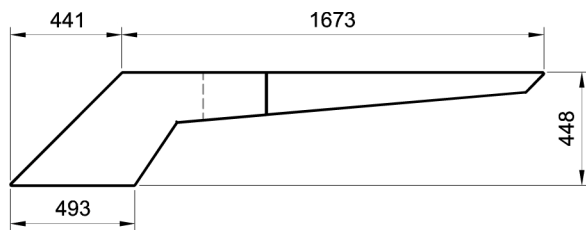

Drawing code:

Revision:

02_01/10/2015

Designer:

Arch. Ivan Del Ponte
Arch. Matteo Zambelli

Product: Bench model “WING”, name recalled by its shape, composed by a monolithic seat equipped with shaped overhang slats that offer a comfortable seat at both high and low temperatures.

Dimensions: length : 2411 mm;
width: 634 mm;
height: 450 mm;
total weight: about 382 kg.

Material: The bench can be manufactured using reconstituted natural marble stones or white granite conglomerate. Wooden slats are offered with two different types of essence: movingui or pine.

Reinforcing: The bench is reinforced and endowed with bushes that permit its lifting, and that are covered with a Bellitalia plate after the placement.

Finishing: All surfaces are sandblasted and then covered with a transparent anti-decay coating, or, upon request, with nanotechnology and/or anti-graffiti products. All wooden elements in movingui and pine can be impregnated and painted with a protective varnish, or treated, upon request, with an ultra-resistant coating, like “Sikkens”. All edges are rounded or made blunt.

Handling: Use appropriate equipment when handling.

Installation: Identify the correct position and drill the holes in the flooring, then fasten with a chemical bi-component anchor and thread bars screwed on the bushes fitted on the bench’s base.
