

## “ERACLEA” Bench with wood and single backrest

Sheet code: **PAAR067**

Drawing code:

Revision:

02\_01/10/2015

Designer:

Arch. Matteo Ceschini

**Product:**

Linear bench model “ERACLEA”, composed by a light, supporting base arranged to lodge wooden slats that offer a comfortable seat at both high and low temperatures. Two single backrests are fastened to the seat.

**Dimensions:**

length: 2200 mm;  
width: 610 mm;  
height: 784 mm;  
total weight: 514 kg.

**Material:**

The bench can be manufactured using reconstituted natural marble stones or white granite conglomerate. The covering is composed by 10+8 wooden slats offered with two different types of essence: movingui or pine. All slats have a section of 55x35 mm, except for the head ones that have a section of 53x120 mm. Slats are fastened to the seat through screws and three stainless steel plates, arranged to ease the water discharge under the slats.

**Reinforcing:**

The bench is reinforced with bushes and a double electric welded frame.

**Finishing:**

All bench's surfaces are sandblasted, except for the upper rim that can be polished, to give the product a shiny effect, or bush-hammered, for a rough appearance. Surfaces are then covered with a transparent anti-decay coating, or, upon request, with nanotechnology and/or anti-graffiti products. All wooden elements in movingui and pine can be impregnated and painted with a protective varnish, or treated, upon request, with an ultra-resistant coating, like “Sikkens”. All edges are rounded or made blunt.

**Handling:**

Use appropriate equipment when handling.

**Installation:**

Simply place on the flooring.
