Designer:

Bellitalia Design Department

Product: Modular bench model curved "DEMETRA", composed by a monolithic seat supported by a base equipped with a **levelling system**.

Dimensions: width: 600 mm;
internal radius: 1900 mm;
external radius: 2500 mm;
height: 480 mm (variable);
total weight: 1139 kg.

Material: The bench can be manufactured using reconstituted natural marble stones or white granite conglomerate.

Reinforcing: The self-levelling base is reinforced and fitted with bushes that permit its lifting and levelling. The seat is also reinforced and endowed with bushes that permit its lifting, and that are covered with a Bellitalia plate after the placement.

Finishing: All surfaces are sandblasted, except for the upper rim that can be polished, to give the product a shiny effect, or bush-hammered, for a rough appearance. Surfaces are then covered with a transparent anti-decay coating, or, upon request, with nanotechnology and/or anti-graffiti products. All edges are rounded or made blunt.

Handling: Use appropriate equipment when handling.

Installation: Level the base screws and simply place the planter on the flooring.
